Decorative & Festive Lighting

Syste

Our decorative and festive lighting range turns houses, gardens, shops and venues into a scene - Christmas trees, wedding receptions, shop windows, courtyards and public displays. The core products are copper-wire and PVC string lights and curtain lights, from 1-metre 10-LED sets to 200-metre 2,000-LED runs, in warm white, cool white and multicolour, with shaped options such as snowflakes, reindeer, stars and baubles for seasonal themes. Power is flexible: battery box for trees and tables, USB for indoor displays, mains plug-in for long outdoor runs, and solar for gardens. Outdoor sets are rated IP43 to IP44, and most models come with a remote offering eight lighting modes - steady, twinkle, wave, chasing and more - plus timer functions on selected sets. Lifespan runs from 5,000 hours on entry sets to 50,000 hours on the better copper-wire ranges. Lengths, LED counts, colours and packaging are all customisable, and we support OEM and ODM orders for seasonal buyers, retailers and event companies who need a full range under one brand. For seasonal buyers we offer early-order production slots so stock lands before the Christmas rush, with mixed cartons that combine string lights, curtain lights and shaped sets under one brand. Custom lengths, plug types for EU, US and UK markets, and private-label packaging are all available, and every outdoor set is tested for water resistance before shipment.
