Portable & Camping Lighting

Syste

Our portable and camping lighting range is made for buyers who need light that travels - campsites, tents, emergency kits, night markets and outdoor events. All models are USB rechargeable on 5V, with 1,200 to 2,000mAh lithium batteries, and selected models add solar charging or a hand-crank so the lamp keeps working off-grid. Power runs from 1W flame-effect lanterns to 10W campsite lights, with runtimes of 12 to 16 hours on a charge and up to 48 hours on low mode. Water resistance spans IPX4 splash-proof to IP66, and housings are lightweight ABS at 170 to 490 grams, so the lamps hang from a tent hook, sit on a table or pack flat in a kit. Stepless dimming lets users go from bright task light to a low amber glow, and SOS mode is built in for emergencies. Styles range from retro lanterns to compact cube lights and solar flame lanterns, all available with custom colours, packaging and branding for retail, gift and promotional orders. The range also works for promotional and gift buyers: custom colours, printed logos and gift boxes are available from low minimums, and several models double as power banks for phones. For emergency and relief buyers we can supply bulk cartons with mixed models, so one shipment covers tents, kitchens and walkways.

Key features

- Portable lanterns

- Cam

Specification table

Parameter	Value
Battery	1,200-2,000mAh Li-ion (18650)
Charging	USB 5V (solar / hand-crank on selected models)
Power	1-10W
Runtime	Up to 12-16h (up to 48h on low mode)
Ingress protection	IPX4-IP66
Weight	170-490g
Light modes	Stepless dimming / SOS
Housing	ABS
Certifications	CE / RoHS / FCC

Preliminary datasheet. Specifications are market reference values published for quick launch; confirm the exact specification, certification and price with the factory before ordering. Certificate copies are issued on request with your quotation.
